

BUILDING FRONT PHOTOS SHOWN IN POLARIS AND PROPERTY RECORD SEARCH

March 2023

Background Information

Building Front Photos were captured historically over time through a vendor collection project initiated over multiple collection cycles and over multiple prior years. Since then no more activity has been conducted by the County to bring building photos County-Wide to further currency. It is now very cost-prohibitive to continue with this collection and update approach. The County is currently exploring new technologies going forward in hopes of replicating the capabilities provided by both Google Street View and Bing Maps Street View regarding keeping Street Front Building viewing more current and shared.

Reason to Retain the most Current Building Photo on file (Even if old)

To provide a practical makeup of the overall neighborhood related to the common age and quality of structures to derive adjacent commonalities related to tax assessment and valuation analysis.

Building Photo Eligibility for Removal from POLARIS and Property Record Card Search

The County has agreed to approve Building Photo removals on their public-facing applications based on:

1. If the current building on the property has been structurally altered, added onto, or reshaped in a major way where the "Historic" photo no longer represents the current exterior design. Based on more recent building permits pulled.
2. If the "Historic Building Photo" being shown in Polaris or in Property Record Search is not the "correct" building photo assigned to the parcel record on file.
3. If privacy is being violated in the "Historic Building Photo" because of people shown and not blurred out, visible license tags, etc. are unintentionally displayed in the building photo.

To Request For Building Photo Removal From Polaris and Property Record Card Search and you meet the requirements above: [Click Here and Fill out the Service Request form.](#)
